

*Portable Evaporative Cooler*

**COOLSPACE**  
12910 Ford Dr  
Fishers IN 46038

February 6, 2008

**FOR IMMEDIATE RELEASE**

**LET THE SHOWS BEGIN!**

Evaporative cooling has come a long way in the past 10 years. The thought of a swamp cooler working anywhere besides the desert was pretty main stream. That wasn't the case last year with the state of Florida leading in **COOLSPACE** sales.

Every year **COOLSPACE** fills up the calendar showing off at shows, conventions, fairs & festivals. This year is no exception starting the month off at the **NADA** (National Auto Dealers Assoc. San Francisco Feb 9-12) **booth 2351W, Dealers Expo** (motorcycle dealers, Indianapolis Feb 16-18) **booth 7101**, and the **HELI Expo** (helicopter convention, Houston Feb 24-26) **booth 1900**. "The best way to educate the buyer is by demonstration and conventions seem to be the best avenue to reach the buyer." (Nick Reilly, **Team COOLSPACE**).

This year **COOLSPACE** is working even harder to educate people on the value of portable evaporative cooling. With a fragile economy and the importance of energy efficient products, now is the best time to teach people how to keep their employees comfortable using only water and very little electricity. No matter the size of the job, **COOLSPACE** trained experts can recommend the best and most efficient way of keeping your employees comfortable during the hot summer months.

Hope to see you at the show!
