COOLSPACE REMAINS THE COOLEST IN LAS VEGAS

Every year **COOLSPACE** exhibits at the ever so popular and growing **SEMA** convention in Las Vegas. It's the largest car show that focuses on the special equipment market. All the top players and the who's who attend SEMA, for both bragging rights and to show off the most righteous and wicked looking designs the imagination can think of...and put them on a vehicle.

Being an exhibitor at SEMA is the best way to show potential buyers the differences between **COOLSPACE** and the competition. Showing off our built in 46 gallon water reservoir with an automatic shut off on the pump, which allows hours of operation without a hose connection. It is a great feature that the customers want and no other company offers. With more end user features than any other cooler, as well as "the longest warranty in the Industry", **COOLSPACE** blows the competition away.

Lou Santiago from the hit TV Show "**Muscle Car**" on the Speed Channel quotes "These fans are great because they cool such a large area! Not to mention my power bill isn't through the roof"

Be sure not to miss this upcoming season of **Muscle Car**!

COOLSPACE continues to be the Best option to cool down hot areas, where conventional air conditioning is not an option.
